EAGLE2015scaricare32bits(1) not working properly. It also changes the v1.6 to v1.6b. On the bottom of the.xml file is a small "a" inside an oval. When I press the key. A quick Google search revealed the following page. The instructions are: You need to download the "cursor.jar" located on the servers. However, the server is down. A quick Google search revealed the following page. The instructions are: Open up Xith-player (the default name.jar file and replace it with the one you just downloaded. Anyway, I created my key with AdwCleaner and the new.xml file successfully installed. . I also noticed when I try to access my key from the Xith program, I can actually view the key, however when I try to change the registry ID it keeps coming back as my old ID, which it was using in a prior version of the key. Anyone have any ideas? I wanted to

thank whoever was able to post this thread because it was extremely helpful. You should clean the Registry entries. I've done this before and it worked well. It's hard to find instructions online though, so I'm having trouble helping. So you've installed the latest version of XithPlayer with the new Key and all is well. However, I noticed a small bit of confusion when I downloaded my new key to replace my old one in XithPlayer. I was able to access the key, but when I tried to change the registry ID to my new one, it returned back to my old ID. Anyway, I tried cleaning the Registry entries and it worked. For anyone else having the same problem, here's what you need to do. Open up XithPlayer (the default name.jar file and replace it
