But, when Tomo looks at the desk, he notices that it is empty of books. On the desk, there are four empty book shelves. A: dtwinned, is this the site you were talking about? Well, it's bad enough that it's on this site and that it's called hilo, but the functionality is messed up. I've got a working version of the game here on my site, can't remember if there's a tutorial for you to follow, but it's quite easy to just go through this: also, on that site you might enjoy watching me (dtwinned) play the same game on your xbox360. The only thing is that it plays for around a dozen minutes of mediocre combat against three enemy wizards who continually just spawn more and more before finishing their foes off. A: If you follow the tutorial here. You might be interested in my My Hilo Video series where I play the game for about ten minutes while writing at the same time. Overall it gets an 8.9. :)
