Difficulty Reading Book Reviews

I'm quite a book reader but I find that the words used to review books in the mainstream media are often inaccessible and make you feel you are missing out when you are not familiar with the language. It's not like me to make a fuss over language, but I find a lot of the time I am reading about books that are in fact brilliant but are inaccessible because they use words I don't understand. I find it ironic that they can often make a word seem like it has a meaning that is totally different to the meaning of the dictionary definition of that word (e.g. "boring" as used to describe a book). For example, the words used to review Amy Tan's *The Bonesetter's Daughter*, meant it was really a fun read. However when I went to the dictionary to see the definition of "boring" it said it means: 1. not very interesting 2. not attractive; unattractive. Thinking of the first definition that used the word, I can see where the book reviewer meant it was not very interesting because it was a historical book set in an era I wasn't familiar with. But based on the second definition, it actually is very interesting. So where is the line between the two? If they used the definition of "boring" in the book review as an adjective, I feel it could be a bit of a different story. One reviewer, when reviewing a book said: "I found it to be just a history book." Which is a fine definition of boring. But the book was from her perspective for the author to write about her own personal history. I was delighted with her review, however I might not
