Autodesk Revit 2017 Crack & Serial Key [Windows & Mac].Q: Explicit specialization of template member functions (Functional Programming?) Problem I have this template class with only forward declared members (i.e. the rest is in an implementation file):  
template class MyClass { public: T value; operator T () { return value; }  
}; #include "MyClass.impl" And then i want to specialize this member function for a T type that i  
define myself: template c6a93da74d
